**Discovering Psychology**

The Science of the Mind

John Cacioppo, University of Chicago
Laura Freberg, California Polytechnic State University

© 2019 | 784pp | 9781337561815

In Discovering Psychology, the authors present a cohesive understanding of the field, highlighting connections within psychology as well as between psychology and other disciplines. Through smart and engaging writing, illuminating visuals, and sound science, students will discover that the field of psychology is larger, more diverse, more exciting, and more relevant than they may have realized. With this text, your students will improve their critical thinking skills, gain an understanding of research, and get a glimpse of the current state of science about the mind.

Gateways to Mind and Behavior

Dennis Coon, Brock University
John O. Mittrerer, Brock University
Tanya S. Martini, Brock University

© 2019 | 736pp | 9781337565691

Welcome to the world of psychology – and a journey through the gateways to mind and behavior. This text integrates a proven system for reflective learning: Survey, Question, Read, Reflect, Review, and Recite. By following these steps for efficient studying, students master psychology’s concepts and explore its diversity of topics that are relevant to today’s world. Active learning tools are interspersed with examples and anecdotes in a conversational style, along with coverage of the field’s newest research findings.

**Psychology**

Foundations and Frontiers

Douglas A. Bernstein, University of South Florida

© 2016 | 864pp | 9781305114302

Focusing on active learning, this book presents important findings from established and current research, emphasizes the many ways psychological theory and research results are being applied to benefit human welfare, and integrates extensive pedagogy. The integrated pedagogical system helps students master the material by supporting the elements of the PQ4R (Preview, Question, Read, Recite, Review, and Reflect) study system. Features designed to promote efficient learning include ‘Try This’ activities that illustrate psychological phenomena by encouraging students to learn by doing, ‘Thinking Critically’ sections that apply a five-question approach to various topics, and ‘Focus on Research’ sections that help students think objectively about research questions and results.

Themes and Variations

Wayne Weiten, University of Nevada, Las Vegas
Edited by Junaid Hassim, University of Pretoria

© 2018 | 9781473748583

Psychology: Themes and Variations is a truly South African version of the landmark text by Wayne Weiten. It addresses complex topics and a range of approaches to provide a comprehensive but accessible introduction to the field, supported by a wealth of South African examples, context and research. This third South African edition is available with MindTap Aplia, an online learning solution that significantly improves student outcomes with thought-provoking questions and engaging activities designed to illustrate key concepts.

**Introduction to Psychology**

11th Edition

James W. Kalat, North Carolina State University

© 2017 | 608pp | 9781305271555

Jim Kalat’s Introduction to Psychology takes an ‘evaluate the evidence’ approach that features a friendly writing style, hands-on ‘Try It Yourself’ activities, and helpful visuals to invite students to engage in the experience of learning psychology. The modular organization breaks each chapter into meaningful ‘chunks’ for structuring learning and ‘What’s the Evidence’ coverage reviews real studies, encouraging students to ask questions like, ‘Does the evidence really support the conclusion?’ The Eleventh Edition draws on the latest research and literature to teach students how to separate the plausible from the scientifically demonstrable in the psychology classroom and beyond it.

**Atkinson & Hilgard’s Introduction to Psychology**

16th Edition

Susan Nolen-Hoeksema, Yale University,
Barbara L. Fredrickson, University of Michigan,
Geoffrey R. Loftus, University of Washington
Christel Lutz, University College Utrecht

© 2016 | 816pp | 9781408089026

Now in its sixteenth edition, this introductory psychology text covers all of the major developments, theories and ideas with an engaging student-centered approach and an international focus. Extensive pedagogical features to aid learning and encourage critical thinking include “Seeing Both Sides” essays which feature experts exploring key topics from different perspectives.
DEVELOPMENTAL PSYCHOLOGY

**Human Development**
A Life-Span View
8th Edition
Robert V. Kail, Purdue University
John C. Cavanaugh, University of West Florida
© 2019 | 720pp | 9781337554831

Filled with real-life examples that aid understanding, *Human Development* has proven its ability to capture students’ interest while introducing them to the issues, forces, and outcomes that make us who we are. The efficient organization (chronological, but with a few chapters on key topical issues) allows this text to be briefer than many other texts for the same course, providing a complete, succinct guide to developmental psychology. Students will gain the foundations in important theories and research that enable them to become an educated interpreter of developmental information in their future careers. In addition, basic and applied research along with controversial topics and emergent trends demonstrate connections between the laboratory and life.

**Essentials of Human Development**
A Life-Span View
2nd Edition
Robert V. Kail, Purdue University
John C. Cavanaugh, University of West Florida
© 2017 | 576pp | 9781305504585

This 2nd edition fills the need for a shorter text that emphasizes the essential, defining features of modern research and theory in human development, ideal for students pursuing a related career such as education, health and human sciences.

**Adult Development and Aging**
8th Edition
John C. Cavanaugh, Consortium of Universities of the Washington Metropolitan Area
Fredda Blanchard-Fields, Georgia Institute of Technology
© 2019 | 496pp | 9781337559089

Written within a bio-psychosocial framework, *Adult Development and Aging* covers the specific age-stages of adult development and aging. In its unparalleled coverage of current research and theory, the authors draw clear connections between research and application alongside a focus on “positive aging” and the gains and losses people experience across adulthood that sets the book apart.

**Human Development**
1st South African Edition
Robert V. Kail, Purdue University
John C. Cavanaugh, University of West Florida
© 2019 | 720pp | 9781473759572

This first South African edition of *Human Development* introduces students to the issues, forces, and outcomes that make us who we are. Set within a South African context with contemporary research and emphasis on the multidisciplinary approach needed to describe and explain how people change over time. The text follows a chronological approach with several chapters dedicated to topical and relevant issues to South Africa including the Umhlonyana and Ulwaluko ceremonies, identity, youth unemployment, gender differences in occupational selection, the proposed NHI, and many more.

All Developmental Psychology MindTaps include **Investigate Development**. Investigate Development is a case-based simulation tool that puts students in real-life roles where they observe, evaluate and make decisions about human development.

With evidence and significant findings from relevant research as well as the patient’s life, students are given the opportunity to fully interact with cases and make informed decisions.

Development Through Life
A Psychosocial Approach
13th Edition
Barbara M. Newman, University of Rhode Island
Philip R. Newman, University of Rhode Island
© 2018 | 688pp | 9781305504592

This text uses a life-stage approach to present development across the life span, drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework. The authors address physical, intellectual, social, and emotional growth in 11 life stages, from the prenatal period through elderhood, focusing on the idea that development results from the interdependence of individuals and their environments at every stage, and placing special emphasis on how optimal development may be fostered throughout life.

Life-Span Human Development
9th Edition
Carol K. Sigelman, The George Washington University
Elizabeth A. Rider, Elizabethtown College
© 2018 | 768pp | 9781337007371

Known for its clear, straightforward writing style, grounding in current research, and well-chosen visuals and examples, Sigelman and Rider’s text combines a topical organization at the chapter level and an age/stage organization within each chapter. Each chapter focuses on a domain of development such as physical growth, cognition, or personality and traces developmental trends and influences in that domain from infancy to old age. This edition includes new research on biological and sociocultural influences on life-span development and offers new media resources that help students engage more actively with the content.

Childhood and Adolescence
Voyages in Development
6th Edition
Spencer A. Rathus, The College of New Jersey
© 2016 | 688pp | 9781305504592

Spencer A. Rathus provides a hands-on approach in this chronologically organized title to support you in helping students understand the link between developmental theories and research as well as their application to everyday life.

Social Psychology
10th Edition
Saul Kassin, Williams College in Williamstown, Massachusetts
© 2017 | 752pp | 9781305580220

Distinguished by its current-events emphasis, the aim to bring the outside world into the field of social psychology, strong diversity coverage, and engaging connections drawn between social psychology and students’ everyday lives, Social Psychology remains one of the most scholarly and well-written texts in its field. Integrating classic and contemporary research, the text also includes comprehensive coverage of social cognition and evolutionary psychology, and features authoritative material on social psychology and the law.

Social Psychology and Human Nature
4th Edition
Roy F. Baumeister, Florida State University
Brad Bushman, University of Michigan
© 2017 | 832pp | 9781305497917

Social Psychology and Human Nature offers a fresh and compelling exploration of the fascinating field of social psychology. It gives students integrated and accessible insight into the ways that nature, the social environment, and culture interact to influence social behaviour. The text’s contemporary approach emphasises the role of human nature – viewing people as highly complex, exquisitely designed, and variously inclined cultural animals who respond to myriad situations.

Social Psychology
1st South African Edition
Roy F. Baumeister, Florida State University
Brad Bushman, University of Michigan
© 2018 | 9781473751415

Offering the best of classic and current research in its field, this text gives essential insight to the power of situations, while also emphasising the role of human nature. Its strong visual appeal with local examples means South African students will easily identify with the content. It has an engaging and accessible writing style for second- and third-language speakers and feature boxes that offer fascinating insights into related topics.

Group Dynamics
7th Edition
Donelson R. Forsyth, University of Richmond
© 2019 | 752pp | 9781337408851

Offering the most comprehensive and in-depth analysis of groups and teams, Group Dynamics combines an emphasis on theory, empirical studies and extended case studies to illustrate the application of concepts to actual groups. With each chapter built around a real-life case, the text takes students beyond simple exposure to basic principles and research findings to a deeper understanding of each topic.
Abnormal Psychology
An Integrative Approach
8th Edition
David H. Barlow, Boston University
V. Mark Durand, University of South Florida
Stefan G. Hofmann, Boston University
© 2018 | 784pp | 9781305950443

Barlow, Durand, and Hofmann’s Abnormal Psychology deftly presents an integrative approach to psychopathology – how biological, psychological, and social factors work together to create disorders, rather than single causes. The successful blend of sophisticated research, an accessible writing style, consistent pedagogical elements (including periodic concept checks), integrated case studies and video clips of clients (available in MindTap®) create a current and highly engaging text.

8th Edition
V. Mark Durand, University of South Florida
David H. Barlow, Boston University
Stefan G. Hofmann, Boston University
© 2019 | 704pp | 9781337619370

Through Durand, Barlow, and Hofmann’s Essentials of Abnormal Psychology, students learn that psychological disorders are rarely caused by a single influence, but rooted in the interaction among multiple factors: biological, psychological, cultural, social, familial, and even political. A conversational writing style, consistent pedagogy, and real case profiles provide a realistic context for the scientific findings. These features show students the real people behind the DSM-5 criteria, the theories, and the research.

Abnormal Psychology and Life
A Dimensional Approach, 3rd Edition
Chris Kearney, University of Nevada, Las Vegas
Timothy Trull, University of Missouri, Columbia
© 2018 | 640pp | 9781337098106

Chris Kearney and Tim Trull’s Abnormal Psychology and Life provides a concise, contemporary, science-based view of psychopathology that emphasizes the individual first. Featuring clinical cases and real first-person narratives, the text illuminates our understanding that abnormal behaviour can be viewed along a continuum. The book also gives students an understanding of the features and epidemiologies, risk factors and prevention, assessment and treatment, and long-term prognosis and associated stigma of mental disorders.

V. Mark Durand, University of South Florida
Stefan G. Hofmann, Boston University
Edited by L. du Plessis and C. Visser
© 2017 | 784pp | 9781473734342

This first South African edition offers students a local version of this well-known text by David Barlow and V. Mark Durand. Balancing biological, psychological, social and cultural approaches, the ground-breaking integrative approach followed is the most modern, scientifically valid method for studying abnormal psychology. Going beyond simply describing different schools of thought on psychological disorders, the authors explore the interactions of the various forces, both global ones and those unique to South Africa and Africa, that contribute to psychopathology.

Abnormal Child Psychology
7th Edition
Eric J. Mash, University of Calgary
David A. Wolfe, University of Toronto
© 2019 | 672pp | 9781337624268

Abnormal Child Psychology introduces you to childhood and adolescent disorders, treatment, and prevention using an approach that recognizes the interconnectedness of biological, psychological, social, and emotional influences. You’ll view each disorder from the perspective of the whole child, with diagnostic criteria as well as emphasis on the strengths of the individual, environmental circumstances, issues pertaining to younger and older age groups, and the risk and protective factors affecting developmental pathways. Case histories, examples, and first-person accounts are at the heart of the text, bringing theories and disorders to life.

Statistics for the Behavioral Sciences
10th Edition
Frederick J. Gravetter, State University of New York
Larry B. Wallnau, State University of New York
© 2017 | 768pp | 9781305504912

This leading introduction to statistics for the behavioral sciences continues to offer straightforward instruction, accuracy and real-world examples. The goals of the book are to teach the methods of statistics and convey the basic principles of objectivity and logic that are essential for science, and valuable in everyday life. The authors help students understand statistical procedures through a conceptual context that explains why the procedures were developed and when they should be used. Students have numerous opportunities to practice statistical techniques through learning checks, examples, step-by-step demonstrations, and problems.

Fundamental Statistics for the Behavioral Sciences
9th Edition
David C. Howell
© 2017 | 9781305652972

Fundamental Statistics for the Behavioral Sciences focuses on providing the context of statistics in behavioural research, while emphasizing the importance of looking at data before jumping into a test. This practical approach provides students with an understanding of the logic behind the statistics, so that they understand why and how certain methods are used. The text includes an abundance of real data and research studies that provide a real-life perspective and help students learn and understand concepts. In alignment with current trends in statistics in the behavioural sciences, the text emphasizes effect sizes and meta-analysis, and integrates frequent demonstrations of computer analyses through SPSS and R.

A History of Modern Psychology

11th Edition
Duane P. Schultz, University of South Florida
Sydney Ellen Schultz, University of South Florida

© 2016 | 448pp | 9781305630048

History doesn't have to be dull, and this book is living proof with coverage of interesting topics ranging from the controversial use of IQ tests at Ellis Island to the psychodynamics of gum chewing. A market leader for over 30 years, A History of Modern Psychology has been praised for its comprehensive coverage and biographical approach. Focusing on modern psychology, the book’s coverage begins with the late 19th century. The authors present an appealing narrative, personalizing the history of psychology by using biographical information on influential theorists, and by showing you how major events in the theorists’ lives affected their ideas, approaches, and methods. Updates in the eleventh edition include discussions of the latest developments in positive psychology, the interpretation of dreams by computers, the use of Coca Cola as a “nerve tonic,” and many other intriguing topics. The result is a book that is as timely and relevant today as it was when it was first introduced.

Hergenhahn’s An Introduction to the History of Psychology

8th Edition
Tracy Henley, Texas A & M University-Commerce

© 2019 | 720pp | 9781337564151

Dreams puzzled early man, Greek philosophers spun elaborate theories to explain human memory and perception, Descartes postulated that the brain was filled with “animal spirits” and Psychology was officially deemed a “science” in the 19th century. In the new Hergenhahn’s An Introduction To The History Of Psychology, noted author Tracy Henley shows you that most of the concerns of contemporary psychologists are manifestations of themes that have recurred for hundreds—or even thousands—of years. Photographs and learning tools, along with fascinating biographical material on key figures in Psychology, engage you and aid your understanding.
